in a thoughtful well informed study exploring fiction from throughout stephen king s immense oeuvre heidi strengell shows how this popular writer enriches his unique brand of horror by building on the traditions of his literary heritage tapping into the wellsprings of the gothic to reveal contemporary phobias king invokes the abnormal and repressed sexuality of the vampire the hubris of frankenstein the split identity of the werewolf the domestic melodrama of the ghost tale drawing on myths and fairy tales he creates characters who like the heroic roland the gunslinger and the villainous randall flagg may either reinforce or subvert the reader s childlike faith in society and in the manner of the naturalist tradition he reinforces a tension between the free will of the individual and the daunting hand of fate ultimately strengell shows how king shatters our illusions of safety and control king places his decent and basically good characters at the mercy of indifferent forces survival depending on their moral strength and the responsibility they may take for their fellow men

this book is comprised of a compendium of summaries from all novels that i have read for almost twelve years obviously the summaries have been documented on my blog since 2016 and seemingly in my opinion it is better bundled in a book form since the statistic views show that the classic fictions are those among most read so i rose to comply with that demand the purpose for which i devote myself to compose 85 summaries is to provide quick reading for novel readers and students numerous genres are presented because i am quite concious those will bequeath you an imaginative horizon as a work of art many of them transcend their expiatory aspects and still more important to us than scientific significance and literary worth is the inspirational impact those novels have on serious readers finally happy reading and i hope you will find this book useful
